Subd. 4. **Application.** (a) The commissioner must develop forms and procedures for soliciting and reviewing applications for grants under this section. At a minimum, a local governmental unit must include the following information in its application:

(1) a resolution of its governing body certifying that the money required to be supplied by the local governmental unit to complete the public infrastructure is available and committed;

(2) a detailed estimate, along with necessary supporting evidence, of the total development costs for the public infrastructure and eligible project;

(3) an assessment of the potential or likely use of the site for ~~bioscience~~ innovative business activities after completion of the public infrastructure and eligible project;

(4) a timeline indicating the major milestones of the public infrastructure and eligible project and their anticipated completion dates;

(5) a commitment from the governing body to repay the grant if the milestones are not realized by the completion date identified in clause (4); and

(6) any additional information or material the commissioner prescribes.

(b) The determination of whether to make a grant under subdivision 3 is within the discretion of the commissioner, subject to this section. The commissioner's decisions and application of the priorities are not subject to judicial review, except for abuse of discretion.

Subd. 5. **Priorities.** (a) If applications for grants exceed the available appropriations, grants must be made for public infrastructure that, in the commissioner's judgment, provides the highest return in public benefits for the public costs incurred. "Public benefits" include job creation, environmental benefits to the state and region, efficient use of public transportation, efficient use of existing infrastructure, provision of affordable housing, multiuse development that constitutes community rebuilding rather than single-use development, crime reduction, blight reduction, community stabilization, and property tax base maintenance or improvement. In making this judgment, the commissioner shall give priority to eligible projects with one or more of the following characteristics:

(1) the potential of the local governmental unit to attract viable ~~bioscience~~ innovative businesses;

(2) proximity to public transit if located in a metropolitan county, as defined in section 473.121, subdivision 4;

(3) multijurisdictional eligible projects that take into account the need for affordable housing, transportation, and environmental impact;

(4) the eligible project is not relocating substantially the same operation from another location in the state, unless the commissioner determines the eligible project cannot be reasonably accommodated within the local governmental unit in which the business is currently located, or the business would otherwise relocate to another state or country; and

(5) the number of jobs that will be created.

(b) The factors in paragraph (a) are not listed in a rank order of priority; rather, the commissioner may weigh each factor, depending upon the facts and circumstances, as the commissioner considers appropriate.

Subd. 6. **Cancellation of grant.** If a grant is awarded to a local governmental unit and funds are not encumbered for the grant within four years after the award date, the grant must be canceled.

Subd. 7. **Repayment of grant.** If an eligible project supported by public infrastructure funded with a grant awarded under this section is not occupied by a ~~bioscience~~ an innovative business in accordance with the grant application under subdivision 4 within five years after the date of the last grant payment, the grant recipient must repay the amount of the grant received. The commissioner must deposit all money received under this subdivision into the state treasury and credit it to the debt service account in the state bond fund.

Sec. 40. Minnesota Statutes 2008, section 174.50, subdivision 6, is amended to read:

Subd. 6. **Grant ~~rules~~ criteria; rulemaking.** ~~Procedures for application for grants from the fund, conditions for their administration, and criteria for priority, unless established in the laws authorizing the grants, shall be established by rules of the Department of Transportation consistent with those laws. The commissioner of transportation shall adopt rules consistent with this section that establish~~ criteria for determining priorities and amounts of grants ~~shall, which must~~ be based on consideration of:

(1) effectiveness of the project in eliminating a deficiency in the transportation system;

(2) number of persons affected by the deficiency;

(3) economic feasibility;

(4) effect on optimum land use and other concerns of state and regional planning;

- 83.1 (5) availability of other financing capability; and
- 83.2 (6) adequacy of provision for proper operation and maintenance after construction.

83.3 Sec. 41. Minnesota Statutes 2008, section 174.50, subdivision 7, is amended to read:

83.6 application for grants, conditions of grant administration, standards, and criteria, including

83.7 bridge specifications, in cooperation with road authorities of political subdivisions, for use

83.8 in the administration of funds appropriated to the commissioner and for the administration

83.9 of grants to subdivisions.

83.10 (b) The maximum use of standardized bridges is encouraged. Regardless of the size

83.11 of the existing bridge, a bridge or replacement bridge is eligible for assistance from the

83.12 state transportation fund if a hydrological survey indicates that the bridge or replacement

83.13 bridge must be ten feet or more in length.

83.14 (c) As part of the standards or rules, the commissioner shall, in consultation with

83.15 local road authorities, establish a minimum distance between any two bridges that cross

83.16 over the same river, stream, or waterway, so that only one of the bridges is eligible for a

83.17 grant under this section. As appropriate, the commissioner may establish exceptions from

83.18 the minimum distance requirement or procedures for obtaining a variance.

83.19 (d) Funds appropriated to the commissioner from the Minnesota state transportation

83.20 fund shall be segregated from the highway tax user distribution fund and other funds

83.31 a facility that houses three programs or more. Programs include Head Start, School

83.32 Readiness, Early Childhood Family Education, licensed child care, and other early

84.13 and the local Youthbuild program, considering safety and skills needed;

84.14 (ii) it is demonstrated by Youthbuild that using Youthbuild will not increase the  
84.15 overall cost of the project; and

84.16 (iii) eligible programs consult with appropriate labor organizations to deliver  
84.17 education and training.

84.18 (b) The commissioner may give priority to:

84.19 (1) projects that collaborate with child care providers, including all-day and
